Issue Date: January 2022 Revision: 2

AWARESDS0308

Safety Data Sheet - Orange Power Air Freshener - Lavender

1. Identification of the material and supplier

All product names:

Orange Power Air Freshener – Lavender 125mL

| Supplier details: | Aware Environmental Products P/L |
|-----------------------------|----------------------------------|
| | 4 Healey Rd |
| | Dandenong South, VIC, 3175 |
| Emergency telephone number: | +1 800 061 801 |
| Material use(s): | Air freshener |
| Date of issue: | January 2022 |

2. Hazards identification

Hazard class/category: Flammable Liquid Category 2, Eye Irritation Category 2A, Skin Sensitisation – Category 1.

GHS label elements:

Hazard statements:

| H225 | Highly flammable liquid and vapour. | |
|------|--------------------------------------|--|
| H319 | Causes serious eye irritation. | |
| H317 | May cause an allergic skin reaction. | |

Signal words: Danger Precautionary statements:

General:

| P101 | If medical advice is needed, have product container or label at hand. |
|------|---|
| P102 | Keep out of reach of children. |
| P103 | Read label before use. |

Prevention:

| P210 | Keep away from heat/sparks/open flames/hot surfaces No smoking. |
|------|---|
| P233 | Keep container tightly closed. |
| P240 | Ground/bond container and receiving equipment. |
| P241 | Use explosion-proof electrical/ventilating/lighting/intrinsically safe equipment. |
| P261 | Avoid breathing dust/fumes/gas/mist/vapours/spray |
| P264 | Wash hands thoroughly after handling |
| P272 | Contaminated work clothing should not be allowed out of the workplace |
| P280 | Wear protective gloves / eye protection / face protection |

Response: No precautionary statements.

| P370+P378 | In case of fire: Use alcohol resistant foam or normal protein foam for extinction. | |
|----------------|--|--|
| P305+P351+P338 | IF IN EYES: Rinse cautiously with water for several minutes. Remove contact | |
| | lenses, if present and easy to do. Continue rinsing. | |
| P337+P313 | If eye irritation persists: Get medical advice/attention. | |
| | · | |

We Research, Develop, Manufacture & Market Environmentally Responsible Products

AWARE ENVIRONMENTAL PRODUCTS P/L

ABN:13 064 573 413

4 Healey Road, Dandenong VIC 3175

www.awareenvironmental.com.au

| P303+P361+P353 | IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. | |
|----------------|--|--|
| | Rinse skin with water/shower. | |
| P333 + P313 | If skin irritation or rash occurs: Get medical advice/attention | |
| P362 + P364 | Take off contaminated clothing and wash it before reuse | |

Storage:

P403+P235 | Store in a well-ventilated place. Keep cool.

Disposal:

P501 Dispose of contents/container in accordance with local regulations.

3. Composition/information on ingredients

| Ingredient Identity | CAS No. | % |
|--|-----------|------|
| Ethanol | 64-17-5 | >60 |
| Citrus terpenes in Citrus aurantium dulcis (Orange) | 8028-48-6 | 5-10 |
| peel oil | | |
| Ingredients, determined not to be hazardous according to GHS criteria, and not dangerous according | | |

to the ADG Code, make up the product concentration to 100%.

4. First-aid measures

Eye contact: If this product comes in contact with the eyes:

- Wash out immediately with fresh running water.
- Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the
 eyelids by occasionally lifting the upper and lower lids.
- Seek medical attention without delay; if pain persists or recurs seek medical attention.
- Removal of contact lenses after an eye injury should only be undertaken by skilled personnel.

Skin contact: If skin contact occurs:

- Immediately remove all contaminated clothing, including footwear.
- Flush skin and hair with running water (and soap if available).
- Seek medical attention in event of irritation.

Inhalation: Should not occur if directions for use are followed.

- If fumes or combustion products are inhaled remove from contaminated area. Lay patient down. Keep warm and rested.
- Prostheses such as false teeth, which may block airway, should be removed, where possible, prior to initiating first aid procedures.
- Apply artificial respiration if not breathing, preferably with a demand valve resuscitator, bag-valve mask device, or pocket mask as trained. Perform CPR if necessary.
- Transport to hospital, or doctor.

Ingestion: If swallowed do NOT induce vomiting.

- If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration.
- Observe the patient carefully.
- Never give liquid to a person showing signs of being sleepy or with reduced awareness, i.e. becoming unconscious. Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably drink.
- · Seek medical advice.

Notes to physician: For acute or short-term repeated exposures to ethanol:

- Acute ingestion in non-tolerant patients usually responds to supportive care with special attention to prevention of aspiration, replacement of fluid and correction of nutritional deficiencies (magnesium, thiamine pyridoxine, Vitamins C and K).
- Give 50% dextrose (50-100 ml) IV to obtunded patients following blood draw for glucose determination.

We Research, Develop, Manufacture & Market Environmentally Responsible Products

AWARE ENVIRONMENTAL PRODUCTS P/L

ABN: 13 064 573 413

4 Healey Road, Dandenong VIC 3175

www.awareenvironmental.com.au

- Comatose patients should be treated with initial attention to airway, breathing, circulation and drugs
 of immediate importance (glucose, thiamine). Decontamination is probably unnecessary more than
 1 hour after a single observed ingestion. Cathartics and charcoal may be given but are probably not
 effective in single ingestions.
- Fructose administration is contra-indicated due to side effects.

5. Fire-fighting measures

Extinguishing media:

- Alcohol stable foam.
- Dry chemical powder.
- BCF (where regulations permit).
- · Carbon dioxide.

Special hazards: Avoid contamination with oxidising agents i.e. nitrates, oxidising acids, chlorine bleaches, pool chlorine etc. as ignition may result.

Special protective equipment for fire-fighters: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. May be violently or explosively reactive.

Hazardous decomposition products: Liquid and vapour are flammable. Moderate fire hazard. Vapour may form an explosive mixture with air. Combustion products include carbon dioxide (CO2) and other pyrolysis products typical of burning organic materials.

HAZCHEM code: 3Y

6. Accidental release measures

Personal precautions: See section 8.

Environmental precautions: See section 12. **Methods for containment and cleaning:**

- For minor spills: Remove ignition sources, and clean immediately whilst wearing appropriate protective equipment, avoiding personal contact with skin and eyes.
- For major spills: Clear area of personnel and move upwind. Alert fire brigade of the location and nature of the hazard. May be violently or explosively reactive. Wear protective equipment as outlined in section 8.

7. Handling and storage

Handling: Containers, even those that have been emptied, may contain explosive vapours. Do NOT cut, drill, grind, weld or perform similar operations on or near containers. DO NOT allow clothing wet with material to stay in contact with skin. Avoid all personal contact, including inhalation. Wear protective clothing when risk of overexposure occurs. Use in a well-ventilated area. Prevent concentration in hollows and sumps. Store in original containers in approved flammable liquid storage area.

Storage: Store away from incompatible materials in a cool, dry, well-ventilated area. DO NOT store in pits, depressions, basements or areas where vapours may be trapped. No smoking, naked lights, heat or ignition sources. Plastic containers may only be used if approved for flammable liquid. Check that containers are clearly labelled and free from leaks. Avoid oxidising agents, acids, acid chlorides, acid anhydrides, chloroformates in storage area.

8. Exposure controls/personal protection

Occupational exposure limits:

We Research, Develop, Manufacture & Market Environmentally Responsible Products

AWARE ENVIRONMENTAL PRODUCTS P/L

ABN: 13 064 573 413

4 Healey Road, Dandenong VIC 3175 www.awareenvironmental.com.au

| Source | Ingredient | Material name | TWA | STEL | Peak | Notes |
|--------------------|------------|---------------|-------------------|---------------|---------------|---------------|
| Australia Exposure | | | | | | |
| Standards | Ethanol | Ethyl alcohol | 1880 mg/m3 / 1000 | Not Available | Not Available | Not Available |

Engineering measures: Engineering controls are used to remove a hazard or place a barrier between the worker and the hazard. Well-designed engineering controls can be highly effective in protecting workers and will typically be independent of worker interactions to provide this high level of protection. The basic types of engineering controls are: Process controls which involve changing the way a job activity or process is done to reduce the risk. Enclosure and/or isolation of emission source which keeps a selected hazard "physically" away from the worker and ventilation that strategically "adds" and "removes" air in the work environment.

Hygiene measures: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period.

Appropriate techniques should be used to remove potentially contaminated clothing.

Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Personal protection:

- **Eye and face:** Safety glasses with side shields or chemical goggles. Contact lenses may pose a special hazard; soft contact lenses may absorb and concentrate irritants. A written policy document, describing the wearing of lenses or restrictions on use, should be created for each workplace or task.
- Skin and hands:
 - o Wear chemical protective gloves, e.g., PVC.
 - Wear safety footwear or safety gumboots, e.g., Rubber
 - The selection of suitable gloves does not only depend on the material, but also on further marks of quality which vary from manufacturer to manufacturer. Where the chemical is a preparation of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application.
 - The exact break through time for substances has to be obtained from the manufacturer of the protective gloves and has to be observed when making a final choice.
 - o Personal hygiene is a key element of effective hand care.
- Respiratory: Type A-P Filter of sufficient capacity. (AS/NZS 1716 & 1715, EN 143:2000 & 149:2001, ANSI Z88 or national equivalent).

9. Physical and chemical properties

Appearance: LiquidOdour: Characteristic

Odour threshold: Not applicableColour: Colourless to yellow

• pH: Not applicable

Melting point/freezing point: -117°C

Initial boiling point and boiling range: 78°C

Flash point: 16°C

Evaporation rate: Not applicableFlammability: Highly flammable

Upper/lower flammability or explosive limits: Lower limit at 19%

Vapour pressure: Not applicableVapour density: Not applicable

• Relative density (Water = 1): 0.80-0.90

Solubility: Immiscible in water

Partition coefficient: Not applicable
 Auto-ignition temperature: 392°C

Decomposition temperature: Not applicable

· Viscosity: Not applicable

www.awareenvironmental.com.au

10. Stability and reactivity

Stability:

Unstable in the presence of incompatible materials.

Product is considered stable.

· Hazardous polymerisation will not occur.

Conditions to avoid: See section 7. **Materials to avoid:** See section 7.

Hazardous decomposition products may include the following material(s): See section 5.

Hazardous Reactions: See section 7.

11. Toxicological information

Acute toxicity: No data available

Skin corrosion/irritation: There is some evidence to suggest that the material may cause moderate inflammation of the skin either following direct contact or after a delay of some time. Repeated exposure can cause contact dermatitis which is characterised by redness, swelling and blistering. Open cuts abraded or irritated skin should not be exposed to this material. Entry into the bloodstream, through, for example, cuts, abrasions or lesions, may produce systemic injury with harmful effects. Examine the skin prior to the use of the material and ensure that any external damage is suitably protected.

Serious eye damage/irritation: Direct contact of the eye with ethanol (alcohol) may cause an immediate stinging and burning sensation, with reflex closure of the lid, and a temporary, tearing injury to the cornea together with redness of the conjunctiva. Discomfort may last 2 days but usually the injury heals without treatment. There is evidence that material may produce eye irritation in some persons and produce eye damage 24 hours or more after instillation. Severe inflammation may be expected with pain.

Respiratory or skin sensitisation: Inhalation of vapours may cause drowsiness and dizziness. This may be accompanied by sleepiness, reduced alertness, loss of reflexes, lack of co-ordination, and vertigo. Inhalation of vapours or aerosols (mists, fumes), generated by the material during the course of normal handling, may be damaging to the health of the individual.

Chronic: Substance accumulation, in the human body, may occur and may cause some concern following repeated or long-term occupational exposure. Prolonged exposure to ethanol may cause damage to the liver and cause scarring. It may also worsen damage caused by other agents.

Germ cell mutagenicity: No data available

Carcinogenicity: No data available Reproductive toxicity: No data available

Specific Target Organ Toxicity (STOT) – single exposure: No data available Specific Target Organ Toxicity (STOT) – repeated exposure: No data available

Aspiration hazard: No data available

12. Ecological information

Ecotoxicity data: No data available.

Persistence/degradability:

| Ingredient | redient Persistence: Water/Soil Persistence: Air | |
|-----------------|--|-----------------------------|
| Ethanol | Low (Half-life = 2.17 days) | Low (Half-life = 5.08 days) |
| Citrus terpenes | High | High |

Bioaccumulative potential:

| Ingredient | Bioaccumulation |
|-----------------|-------------------------|
| Ethanol | Low (LogKOW = -0.31) |
| Citrus terpenes | High (LogKOW = 5.6842) |

We Research, Develop, Manufacture & Market Environmentally Responsible Products

AWARE ENVIRONMENTAL PRODUCTS P/L

ABN:13 064 573 413

4 Healey Road, Dandenong VIC 3175

www.awareenvironmental.com.au

Mobility in soil:

| Ingredient | Mobility |
|-----------------|------------------|
| Ethanol | High (KOC = 1) |
| Citrus terpenes | Low (KOC = 2899) |

13. Disposal considerations

Methods of disposal: Do not reuse product containers. The generation of waste should be avoided or minimised wherever possible. Avoid dispersal of spilled material and runoff and contact with soil and waterways. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

14. Transport information

Required labels:

HAZCHEM code: 2YE Marine pollutant: No UN number: 1170

UN proper shipping name: FLAMMABLE LIQUID, N.O.S. - (CONTAINS ETHANOL, TERPENE

HYDROCARBONS AND LAVENDER OIL)

Transport hazard class: 3

Packing group: II

ADG environmental hazards: Not applicable

Special precautions for user: There are no special precautions to be undertaken by the user.

15. Regulatory information

Safety, health and environmental regulations / legislation specific for the substance or mixture *Ethanol (64-17-5) and citrus terpenes (8028-48-6) are found on the following regulatory lists*

| National | Status |
|----------------------------------|------------------------------|
| Australia – AICS | Y |
| Canada – DSL | Y |
| Canada – NDSL | N (ethanol; citrus terpenes) |
| China – IECSC | Y |
| Europe – EINEC / ELINCS / NLP | Υ |
| Japan – ENCS | N (citrus terpenes) |
| Korea – KECI | Y |
| New Zealand – | Y |
| Philippines – | Y |
| USA – TSCA | N (citrus terpenes) |

We Research, Develop, Manufacture & Market Environmentally Responsible Products AWARE ENVIRONMENTAL PRODUCTS P/L ABN:13 064 573 413 4 Healey Road, Dandenong VIC 3175 www.awareenvironmental.com.au

Y = Both ingredients are on the inventory

Legend:

N = Not determined or one or more ingredients are not on the inventory and are not exempt from listing (see specific ingredients in brackets)

16. Other information

Prepared by: Regulatory Affairs

Date of previous issue: Not applicable

Change Made: None available **Definitions and abbreviations:**

- ADG Code Australian Transport of Dangerous Goods
- Adopted National Exposure Standard for Atmospheric Contaminants in the Occupational Environment
- Approved Criteria for Classifying Hazardous Substances
- List of Designated Hazardous Substances
- National Code of Practice for the Labelling of Workplace Substances
- National Code of Practice for the Preparation of Material Safety Data Sheets
- National Model Regulations for the Control of Scheduled Carcinogenic Substances
- National Model Regulations for the Control of Workplace Hazardous Substances
- Standard for the Uniform Scheduling of Drugs and Poisons

Orange Power Air Freshener – Lavender
